www.resapower.com

As a NETA Certified service provider we assist organizations such as automotive manufacturers, industrial businesses, utilities, refineries, colleges and data centers with critical power distribution and control projects.

At your convenience we would like to review your needs and current programs to evaluate what services we may provide to your business.

Partnering with RESA, you can extend the life of your power distribution and control equipment through predictive and preventative maintenance programs which we can assist you in developing and performing.

ELECTRICAL SAFETY ASSESSMENT

Our complimentary on-site Electrical Safety Assessment will identify potential hazards and OSHA/NFPA 70E® violations. This consists of a review of the following major items:

- Engineering Documentation, including one-line drawings
- Most Recent Arc Flash Hazard Analysis
- Warning Labels
- Personal Protective Equipment (PPE)
- Preventive Maintenance Practices and Procedures
- Safety Training Program

Based on the findings of this Electrical Safety Assessment, we will provide comments and recommendations regarding your facility. The electrical safety Assessment and recommendations are based on industry-wide consensus standards.
