

Power Breaker Buying Options

When choosing life extension options for previously energized equipment, the terminology can be confusing. We've done things differently. RESA shows you specifically what refurbishment and testing processes your product has gone through prior to delivery. Here is a quick guide to understanding our condition terminology:

	LE - Level I (Good)	LE - Level II (Better)	LE - Level III (Best)
Previously Installed Item			
Passed Visual & Mechanical Inspection	✓	✓	✓
Only Top Tier Items Qualify for Resale			
Inspected & Cleaned

Instant-Access Online Test Reports (KVLabs.com)	✗	✗	✓
Warranty			
With Life Extension, Warranty is Extended	60 Days	1 Year	2 Years

Life Extension (LE) - Level III (Best Option)

A LE-III product has undergone all of the same processes as a LE-II product, but it also includes many important enhancements. LE-III products have been fully disassembled & rebuilt, including the operating mechanism. Tested to NETA & ANSI standards and covered by an extended, 2 year RESA warranty.

Life Extension (LE) - Level II

A LE-II product has undergone all of the same processes as a LE-I item. In addition, a LE-II product has been partially dis-assembled, including the breaker contacts. Tested to NETA specifications & ANSI standards and covered by a 1 year RESA warranty.

Life Extension (LE) - Level I

A LE-I product has undergone preventative maintenance including cleaning, lubrication, adjustment and testing. Components are inspected for functionality. Tested to NETA specifications & ANSI standards and covered by a 60 day RESA warranty.
