

# RE-Certified Buying Options.

When dealing with used equipment, the terminology can be confusing. We've done things differently. We show you specifically what refurbishment and testing processes your product has gone through before it ships.

## RE-Certified

A RE-Certified product is comparable to what many of our competitors call "reconditioned", "certified-green", "recertified", "refurbished" or "recon-tested". RE-Certified items have been previously energized and have under gone a 12 point operational & external quality check. We test each of our RE-Certified items to NETA specifications before shipment, and RE-Certified items come with a full 1 year, No-Hassle warranty.

## RE-CERTIFIED PLUS (recommended)

A RE-Certified Plus product has undergone all of the same processes of an RE-Certified item, but it also includes a number of additional important enhancements. RE-Certified Plus items are the market equivalent of a "rebuilt" item, fully inspecting all internal components, replacing or remanufacturing them where necessary. In fact, our RE-Certified Plus items are often substituted for new when factory lead times are unacceptable or when items are no longer in production.
